Teil der INTEGRAL-SINUS-OPINION Gruppe

Fieldwork

16th September to
30th September 2025

Sample

2 Samples / Target Groups

- Internet, n=500
- Mobile Voice, n=500

Representative weighting of the total sample according to demographic characteristics and market shares Mobil, I@H

A1 in Vienna
Key facts, conclusion & recommendations

Key Findings

- **Brand Preference Mobile Voice**: **A1 stable since YE24**
  - A1 is on par with Drei, **while Magenta is currently ahead.**
  - A1 has the highest share of rejectors among competitors – the main reason: price/performance ratio.
- **Brand Preference Internet: A1 stable since YE24**
  - **Magenta is clearly leading** (Magenta has recovered from a slight decline in June) followed by A1 and Drei.
  - A1 and Drei show a similarly high level of rejection; for A1, the key reason is price/performance ratio.
- **Brand Awareness: A1 leads in spontaneous awareness for both mobile and internet providers.**
  - However, spontaneous first mentions of A1 (=Top of Mind) are still clearly ahead but on a lower level than June 25.
- **Brand Image**: A1 continues to be strongly associated with having the "best network quality" and a "reliable, high-quality network" and receives the highest attribution of social responsibility.
  - **Mobile Voice: A1 is now slightly ahead of the competitors in terms of "trustworthy" and "best product and service quality" and remains stable in other areas.** Better ratings **among A1 own customers** compared to April 25 except of price/performance.
  - **Internet: A1 is relatively stable compared to April 25 with a slight increase for "best price performance ratio" and "clear/transparent offer".** Increase **among A1 own customers** in items related to the offer and emotional topics (trust, likeable, makes life easier).
  - **However, Magenta is clearly ahead in many areas of image, especially as an internet provider.**
- **Slight decline in Advertising Recall compared to Wave 1 in April**
  - Most likely remembered is content about net/fibre optics/5G ahead of offers (free months, smartphones, A1 Family) and sports sponsorship.

Reason Why

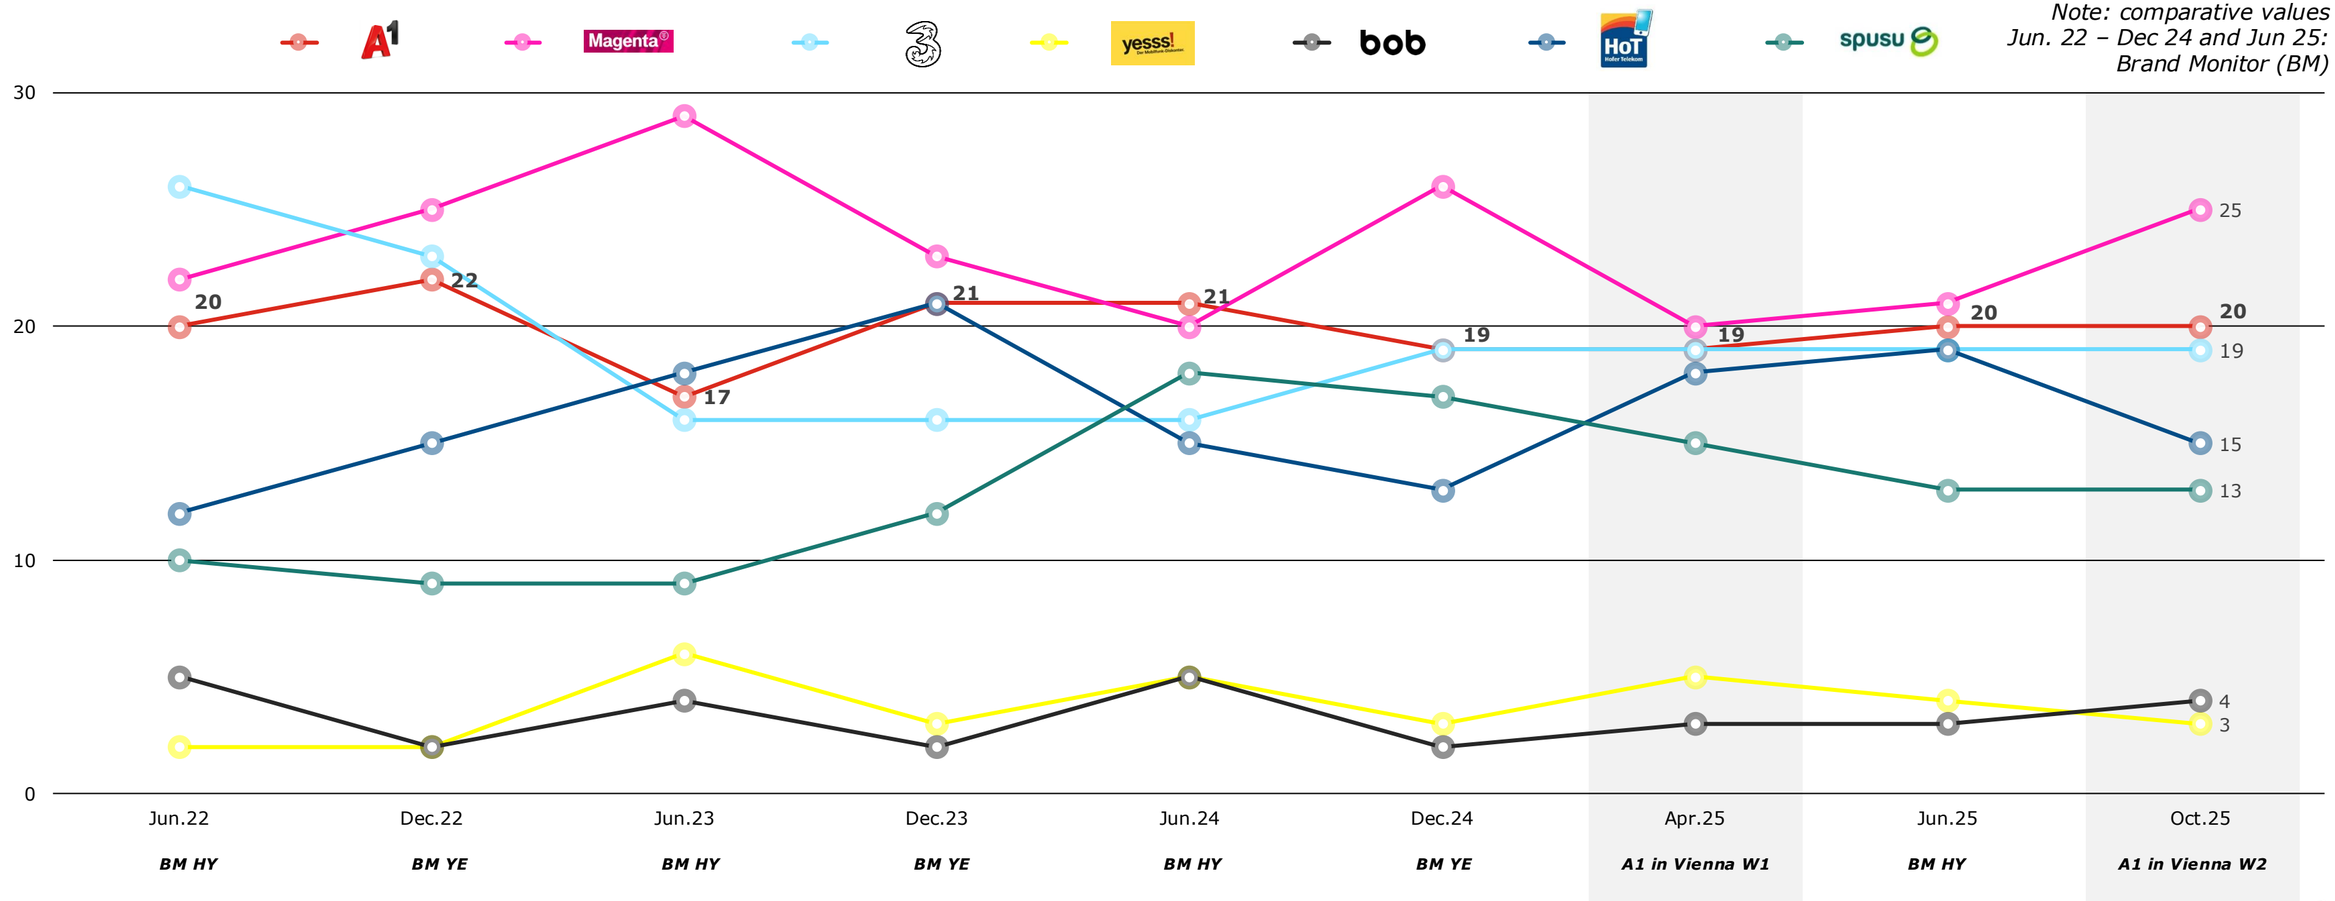
- **Why do Viennese choose A1? (Base: "A1 is the preferred brand" 20%)**
  - Seven out of ten cite network and technology issues as the reason why they would choose A1 in terms of brand preference, 30% CX and trust, and only 10% give offerings or costs as their motivation.
  - By comparison, 40% cite CX and trust for Magenta, 30% offerings/costs, and only 30% network/technology.
  - This means that our image strengths in terms of network and technology are less relevant for Magenta preferrers (and also for Drei preferrers).
- **Why do Viennese reject A1? (Base: "A1 is the least preferred brand" 24%) What are the biggest hurdles?**
  - Price is a very dominant factor here. 70% of Viennese who name A1 as their 'least preferred brand' cite high prices or the fact that the price does not match the service offered. 30% bad experiences and image issues (such as likeability).
- **In which areas is Magenta ahead?**
  - In terms of image, Magenta leads in areas such as 'best meets my needs', "likeable", 'makes my life easier', 'values loyalty' and, of course, price (we have seen some improvement of A1 in certain areas, but image changes happen slowly and Magenta is still well ahead).
- **Why do customers choose a particular mobile phone- or internet-provider?**
  - Mobile phones: 75% cite price as their motivation, while only 35% network issues.
  - Internet: price is less dominant here – price and network are neck and neck, each cited as a reason for 60% of respondents.

A1 in Vienna
Mobile Voice – Brand Preference, Image and satisfaction/Brand NPS

Brand Preference – Compared to Brand Monitor HY 25

The Brand Preference for A1 remains stable since Dec. 2024.
Magenta shows an increase compared to June, Drei is stable, while HoT shows a decline, spusu stabilises after several waves of decline

Note: comparative values Jun. 22 – Dec 24 and Jun 25: Brand Monitor (BM)



Values in %
Question: Imagine you had to choose a mobile phone provider for voice telephony and Internet on your mobile phone/smartphone (this does not refer to mobile Internet via a dongle/tablet). Which provider would you be most likely to choose (regardless of the one you currently use)? Base: All respondents, n=500; with significance level +/- 5% to Brand Monitor HY 2025

Brand Preference

20% would choose A1 (again) as a mobile phone provider, 25% Magenta, 19% Drei and 15% HoT.
45% of all A1 operator clients would choose A1 (again) for mobile phone service. No significant changes in A1 subgroups since April.
