FEHR ADVICE

SEGMENT ENRICHMENT FOR A BETTER CUSTOMER UNDERSTANDING

SEGMENT FACTSHEETS

Alexis Johann, Dr. Marvin Auf der Landwehr, Emily Zima
February 2026

Overall process for reproducing the P&C segments from survey proxies (distribution matching)

FEHR ADVICE

1. INPUTS & GOALS

1A. SURVEY DATA
(Proxies, Actual Status)

Survey data: Price Level, Deal Orientation, RFM, Discount Affinity, Demographics (age, gender)

1A. P&C TARGETS
(Targets, target status)

Target distributions:

Price Level, Deal Orientation, RFM, Discount Affinity, Demographics (Age, Gender)

Priority 1: Total Share
Priority 2: Share by RFM etc

2. METHOD (TWO-STAGE MODEL)

Step 1: GROSS-TUNING
(Finding structure)

Feature Preparation
(Z-Score)

K-Means Clustering
(k=6, Multi-Start)

Best Launch solution
(Permutation-matching)

Step 2: FINE-TUNING
(Local improvement)

Lokale Swaps & Simulated Annealing
(Invariance: Segment sizes fixed. Swap people between segments, accept upgrades according to temperature plan)

3. EVALUATION (SCORE & OPTIMIZATION)

EVALUATION LOGIC
(Loss & Constraints)

Loss Calculation
(Actual vs. Target)

Comparison of all important features
males incl. (re-)normalization.
Partial Losses: Total & Conditional

Overall Score & Rules
Weighted score= $\sum w_i * loss_i$

Hard-Constraints:
$losstotal \leq threshold$
(Accept only valid solutions)

Feedback loop

4. RESULTS & REPORTING

Final assignment
Segment per Person

Validation & Report

Before/After Comparison, Delta Improvements, Swap Log, History
